AN INTRODUCTION TO DREAMSPELL WISDOM

What is the Dreamspell Calendar?

The Galactic Dreamspell Calendar is a time piece translated by Jose Arguelles based on the Traditional Mayan Calendar, the ancient calendar from the Mayan civilisation in Mesoamerica, dating back to 600BC.

The original Mayan people, and the still living Mayan people, had a number of calendars that they used for calculating time and tracking the movements of nature, the stars and cycles of time. In the 1980's Jose Arguelles took the original calendar and translated it for western minds to more easily conceive and thus created the Galactic T'zolkin Calendar.

From my perspective I see the Galactic Dreamspell Calendar as a tool unto which you can begin to tune into the energies of the quantum field. To be able to see patterns that may be arising for you on your own unique journey and use the wisdom of the calendar as a guiding light, to navigate the energies to see you evolve with higher levels of grace and ease.

Through understanding your own unique Soul Signature you are able to recognise and acknowledge your own innate energetic contribution to this world and use this as a compass to your centre.

Coming into more natural time (the Galactic Calendar is a 9 month cycle, aligned with our human gestation period, you enable yourself to come into right relation with other aspects of your life.

Throughout my journey with The Galactic Dreamspell calendar it has deepened my connection to my purpose, the qualities that I naturally hold within and brought me to challenge where I was out of alignment. It gifts me a fresh perspective everyday of what the underlying energy is showing me and how I can work with that energy to support myself and my clients.

The Galactic Dreamspell Calendar is a great passion of mine and one that I love to share, shifting the way we perceive time and our relationship to it.

As Jose Arguelles stated;

What if time is not money...
What if time is art?

Through the Galactic Dreamspell Calendar, I believe, we can begin to unravel from our conditioning and step more fully into our fullest potential and expression, as creators of our lives and reality.

How Can I Work With The Galactic Dreamspell Calendar?

On the pages that follow I have included a Calendar and a Dreamspell Key that you can print and keep somewhere visible for you to tune into daily.

To stay track of where we are at with the Galactic Calendar, my first T'zolkin Calendar Teacher recommended a highly technical technique of using Bluetac on the day and simply moving it each day. Which is the technique I still use to this day.

Laminating the calendar to keep it fresh is highly recommended.

I also recommend using an app for your phone... There are many available however, ones that I have personally used are

Android - Dreamspell Calendar
iPhone - 13:20 Sync

Both are full of wisdom and very user friendly.

My recommendation is to tune into the calendar in a morning to get a sense of the energy of the day and then have yourself a journal where you can note down your experience that day. What came up for you? What situations came your way? What emotions were you feeling? Making a note of the Dreamspell day and see what comes up for you.

The real magic I have found is reflecting back over time. To see the patterns that emerge. That White Dog days may bring up particular things for me. Or I always feel a particular way when White Wind is in town. Seeing these patterns and what is reflected within the nature of that energy can show you your areas of growth and where some fine tuning could be beneficial.

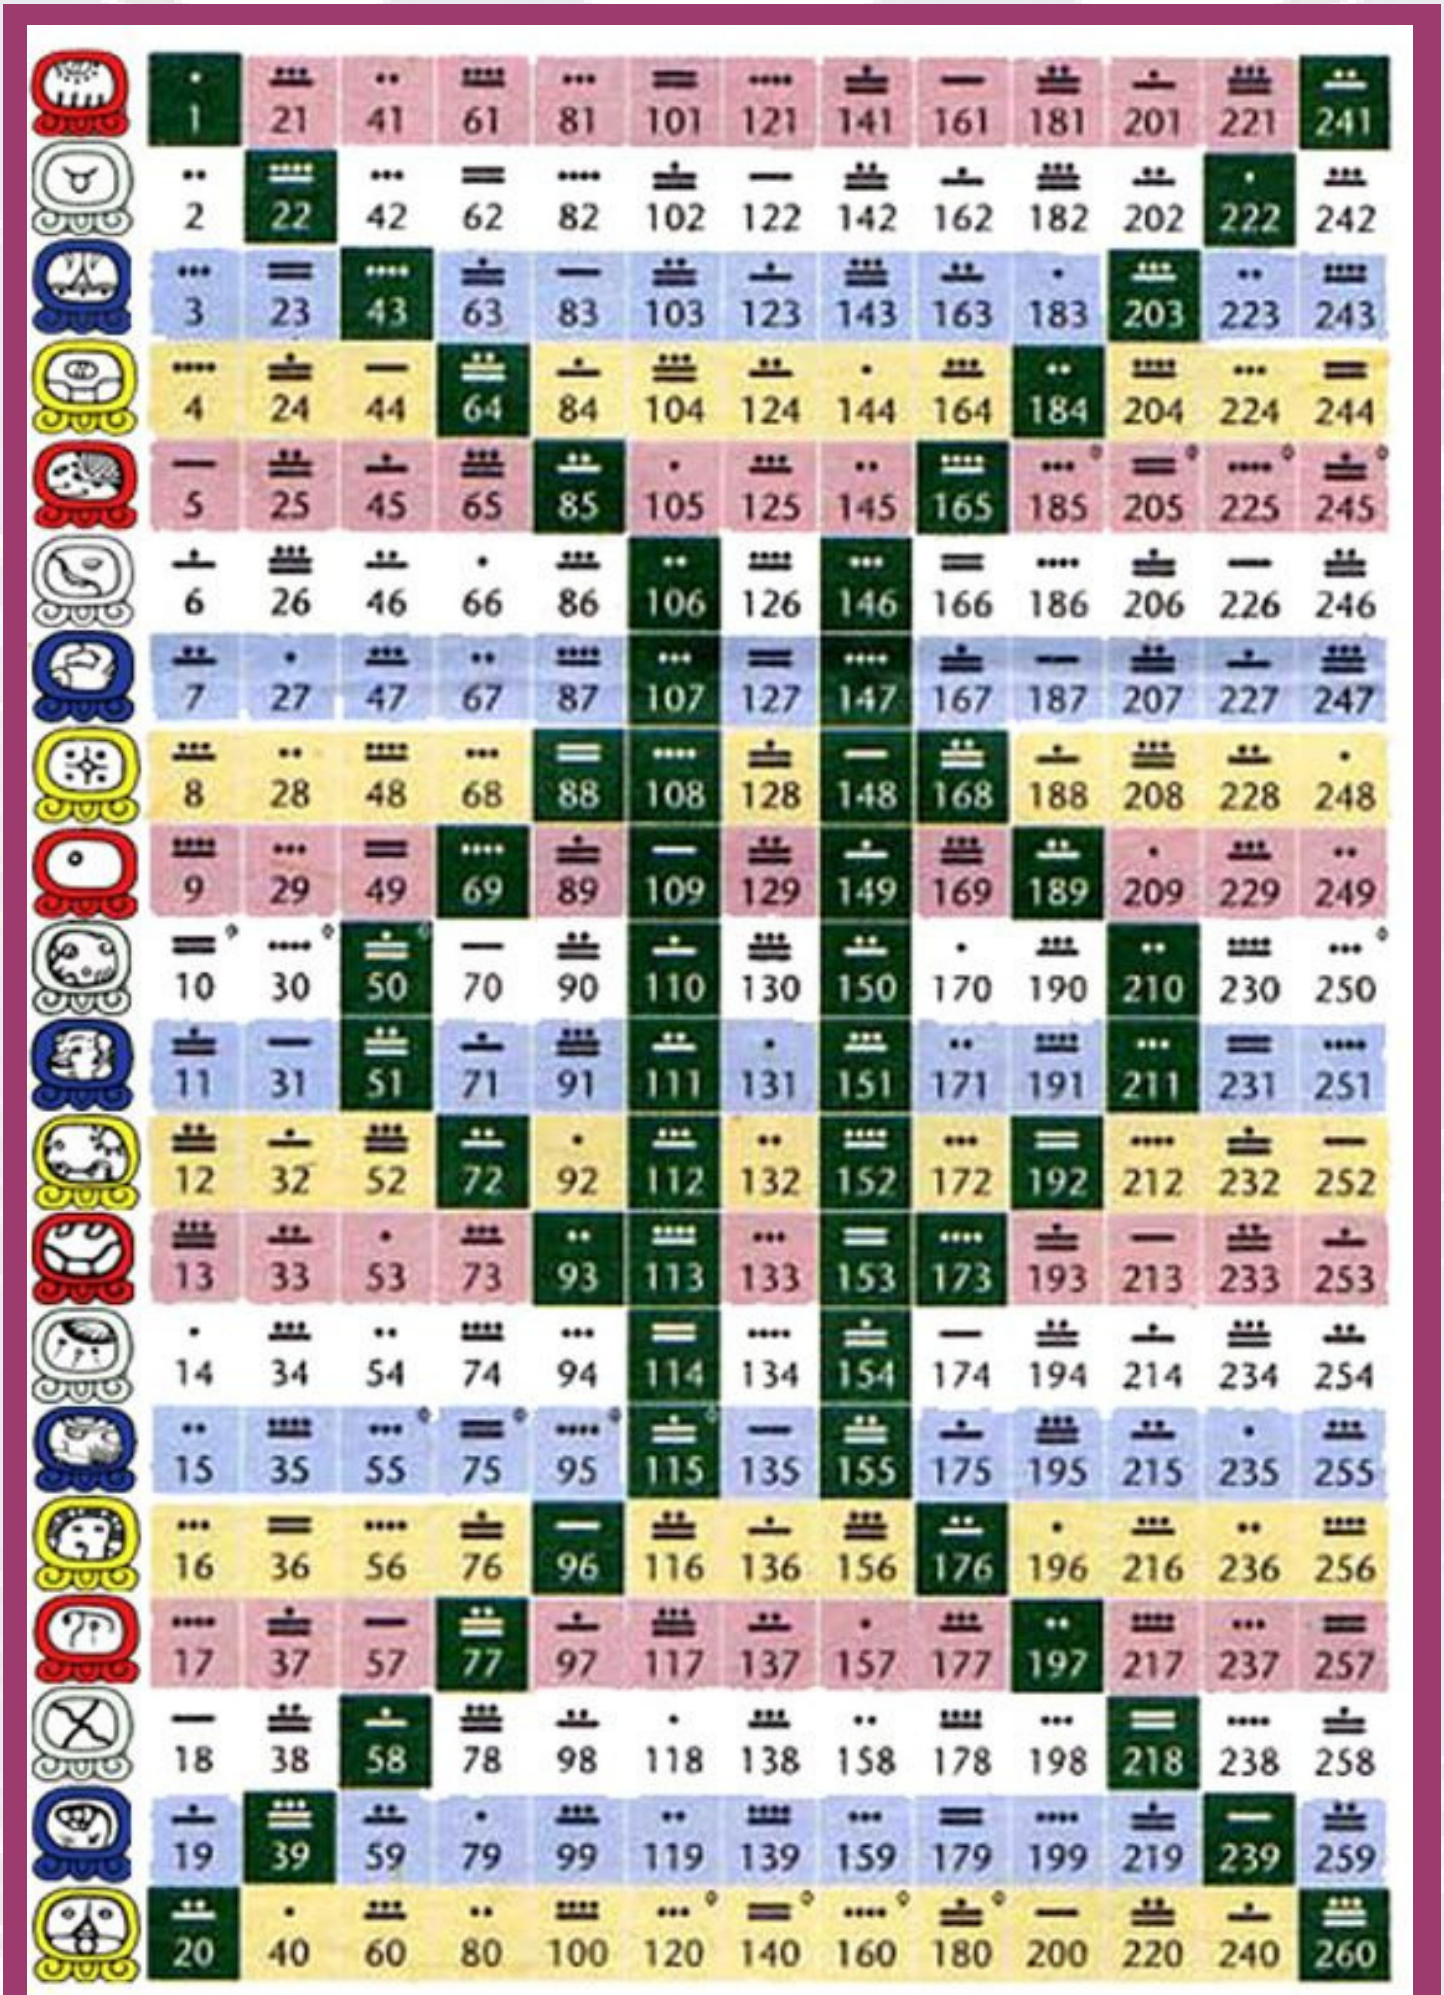

To gain deeper insight into all things Galactic Dreamspell Calendar I highly recommend resources of Law of Time and Light Centre Love there are also plenty of other resources available with Facebook Groups, websites, blog sites and an abundance of other material just remember to be guided by your intuition.

This is a big box of information, with not only vast amounts of new things to process within the Galactic Calendar but also branching out into other calendars as well. It can be easy to become overwhelmed. Begin simple and take it a piece at a time. Be ready that it may not make sense and be ok that it may all seem like gobbledegook... You will feel if it resonates and trust that there is plenty of time to uncover its secrets.

All in perfect time.
